
Researchers Use Of RDC Data

Researchers use RDC data to investigate a wide range of social, economic and health-related issues, from child poverty to eldercare, from school success to workplace stress, from Aboriginal health to immigrant integration, from family-life balance to health service and policy.

Current and Recently Completed Research Projects

To learn more about the research that is underway throughout the CRDCN, you can browse the list of [current and recently completed research projects](#) [1] on Statistics Canada's website. Many RDCs also provide a list of projects that are underway at their centre on their respective websites. [Find an RDC location](#) [2].
